Ekin Tanuwijaya

Fullstack Developer - Samsung R&D Institute Indonesia

Jakarta,Indonesia | P. +62 88223969004 | ekin.tanuwijaya@gmail.com | linkedin.com/in/ekintanuwijaya/

Summary

Fullstack Developer at Samsung R&D Institute Indonesia with experience developing enterprise analytics platforms, backend services, workflow automation, and data engineering solutions. Proficient in React, TypeScript, PostgreSQL, and modern development tools, with hands-on experience integrating AI-powered capabilities, building data pipelines, and implementing CI/CD automation. Strong background in delivering maintainable software solutions, improving application reliability, and collaborating across engineering teams.

Experience

Samsung R&D Indonesia

Jakarta, Indonesia
Apr 2024 - Present

Fullstack Developer

- Developed and enhanced enterprise analytics dashboards using React and TypeScript, enabling internal stakeholders to access, analyze, and manage business-critical data.
- Designed and integrated automated email reporting capabilities with the company's internal mailing system, supporting both scheduled report delivery and on-demand email notifications.
- Developed backend services implementing the Model Context Protocol (MCP), enabling standardized integration between AI-powered applications and backend tools.
- Built an AI-powered pull request review workflow using GitHub Actions, Large Language Models (LLMs), and Langflow to automate code review processes and support code quality improvements.
- Developed and orchestrated data pipelines using Apache Airflow to automate data processing workflows and support analytics requirements.
- Implemented dashboard functionality, including bulk data updates, CSV exports using RabbitMQ-based asynchronous processing, and AI-powered search capabilities.
- Collaborated on frontend and backend development to deliver scalable, maintainable features aligned with internal business requirements.

Samsung R&D Indonesia

Jakarta, Indonesia
Mar 2023 - Feb 2024

Frontend Developer - Intern

- Developed dashboard user interfaces using React and TypeScript
- Built PostgreSQL queries to support dashboard data needs
- Created AWS Athena queries for advanced data analysis
- Gathered and cleaned mobile phone specifications for dataset creation

Education

BINA NUSANTARA UNIVERSITY, Jakarta 2020 - 2024
Bachelor of Computer Science | GPA : 3.94 / 4.0

- Learned basic programming skill such as Algorithm, Data Structure, Database System, Software Development,Web Programming, and Operating System

Skills

- Programming Languages: TypeScript, JavaScript, Java, SQL, HTML, CSS
- Frontend Development: React.js
- Backend & Integration: Backend Services, REST API Integration, Model Context Protocol (MCP)
- Database & Data Engineering: PostgreSQL, AWS Athena, Apache Airflow, Data Pipelines
- AI & Automation: Large Language Models (LLMs), Langflow, AI-Powered Workflows
- DevOps & Messaging: GitHub Actions, CI/CD Automation, RabbitMQ
- Languages: Indonesian (Native), English
